

An abstract digital background on the left side of the slide. It features a dark blue space filled with numerous glowing nodes of various sizes and colors (white, yellow, orange, blue). These nodes are interconnected by thin, light blue lines, forming a complex network. Overlaid on this network are several large, flowing, wavy lines in shades of blue and white, creating a sense of movement and data flow.

Viral Video Performance Analysis

Analyzing 400 videos across 10 performance metrics to uncover what drives short-form video success

Dataset Overview

400 Videos Analyzed

Our comprehensive dataset spans various niches and formats, providing a rich foundation for analysis.

10 Key Metrics

Each video was meticulously evaluated against a suite of performance indicators to ensure robust insights.

195 Million Total Views

Aggregated reach across all analyzed content, demonstrating significant audience engagement.

Data Preparation Workflow

01

Data Loading & Exploration

Imported dataset using pandas, ran initial checks on structure and statistics

02

Quality Verification

Confirmed zero missing values across all 400 rows and 10 columns

03

Feature Engineering

Created duration categories and growth percentage calculations

04

Data Cleaning

Identified and corrected data entry errors exceeding 100% growth

05

Database Integration

Loaded cleaned dataset into MySQL for advanced analysis

Growth Pattern Categories

Flash Viral

Strong first hour, then gradually declines

Early Growth

Good start with moderate traction

Balanced Growth

Performs consistently over time

Late Viral

Not strong initially, goes viral later

Top Revenue-Generating Niches

Weighted by views, hook strength, and retention rate

Video Duration Impact

Late Viral Performance by Length

Key Finding: Short videos (avg 11.5 sec) produce the highest percentage of late viral content at 29.2%

Missed Monetization Opportunities

High retention videos with below-average first hour views

Peak Retention

Beauty niche video with only 11.8K first hour views

Travel Content

Strong retention but slow initial growth at 2.6%

Beauty Video

802K total views despite modest 21.5K start

Music Type Strategy

Late Viral Growth by Music

- **Viral Track:** 13.21% avg growth, 18 late viral videos
- **Remix:** 12.01% avg growth, 18 late viral videos
- **Trending:** 8.55% avg growth, 19 late viral videos
- **No Music:** 8.32% avg growth, 22 late viral videos
- **Original:** 8.02% avg growth, 23 late viral videos

Upload Timing ROI

Strategic Insight: Wednesday posts generate highest ROI, followed by weekend content

A person with dark hair is seen from the side, sitting at a desk and working on a laptop. The laptop screen displays a dashboard with various charts, including a line graph with an upward arrow and a bar chart. On the desk, there is a white mug and a small potted plant with green leaves. The background shows a window with light-colored curtains.

Key Takeaways

Niche Selection

Motivation and Food content drive highest revenue potential

Duration Strategy

Short videos excel at late viral growth (29.2%)

Music Matters

Viral tracks and remixes boost growth percentage significantly

Timing Optimization

Wednesday uploads maximize ROI per video
